AAAS Statement on Continuing Resolution Urges FY 2018 Final Omnibus Bill

“We are encouraged that policymakers worked together to pass a continuing resolution to fund the government through February 8. We hope that Congress will continue on a bipartisan path toward a final omnibus bill for fiscal year 2018 and urge members to raise the budget caps for discretionary spending, which is how the majority of federal research and development is funded. The American scientific enterprise depends on a functioning government that invests in scientific research, innovation and our economy.”

-- Rush Holt, chief executive officer, American Association for the Advancement of Science (AAAS)

###

The American Association for the Advancement of Science (AAAS) is the world’s largest general scientific society and publisher of the journal *Science*, as well as *Science Translational Medicine*; *Science Signaling*; a digital, open-access journal, *Science Advances*; *Science Immunology*; and *Science Robotics*. AAAS was founded in 1848 and includes nearly 250 affiliated societies and academies of science, serving 10 million individuals. *Science* has the largest paid circulation of any peer-reviewed general science journal in the world. The nonprofit AAAS is open to all and fulfills its mission to “advance science and serve society” through initiatives in science policy, international programs, science education, public engagement, and more. For additional information about AAAS, see www.aaas.org.
